Jakość
& technologia

30 lat...

...doświadczenia i tysiące zrealizowanych inwestycji w całej Europie.

Rzetelna, uczciwa i sprawna obsługa klientów, profesjonalizm oraz najwyższa jakość produktów – wszystko to sprawia, że WMB od lat cieszy się niesłabnącym zaufaniem Klientów.

Na każdym etapie realizacji inwestycji możesz liczyć na fachowe doradztwo, dzięki czemu montaż sztukaterii stanie się prostszy i przyjemniejszy, a końcowy efekt zadowoli nawet najbardziej wymagających klientów.

EN

30 years of experience and thousands of projects in whole Europe.

Honest, efficient, professional customer service as well as highest quality of products – all these elements are responsible for the undiminished customer confidence.

On every part of the investment you can count on our professional advice; therefore, the installation is faster, easier and the final effect will satisfy even the most choosy tastes.

DE

30 Jahre Erfahrung und Tausende von Bauunternehmen in ganz Europa.

Ehrliche, effiziente, professionelle Kundenbetreuung sowie höchste Qualität der Produkte – all diese Elemente sind für das unverminderte Vertrauen der Kunden verantwortlich.

Auf jeder Etappe des Bauunternehmens können Sie sich auf einen professionellen Rat verlassen, daher ist die Installation schneller und einfacher. Das endgültige Ergebnis wird selbst die meist wählerischsten Geschmäcker zufrieden stellen.

Technologia & materiały

Do produkcji naszych wyrobów stosujemy wyłącznie najwyższej jakości atestowane surowce. Rdzenie produktów wykonane są z twardych pianek polistyrenowych EPS lub poliuretanowych PU. Powłoki zewnętrzne to dyspersje styrenowo-akrylowe, z dodatkami modyfikującymi i wypełniaczami kwarcowymi oraz powłoki cementowe zbrojone włóknem szklanym.

Dbamy o Środowisko! Nasze produkty są wolne od szkodliwych substancji, przez co są bezpieczne dla ludzi i środowiska.

Dysponujemy **unikalną technologią** i materiałami pozwalającymi wiernie odtworzyć dowolny detal architektoniczny.

Nasze produkty to nie tylko **elegancja i estetyka**, to połączenie dawnych tradycji dekoratorskich z najnowocześniejszymi technologiami stosowanymi w budownictwie.

UWAGA! Kolor produktów przedstawionych w katalogu jest kolorem przykładowym.

Technology & Materials

Our Products are manufactured only from top-quality certified raw materials. Product cores are made from expanded polystyrene foams (EPS) or polyurethane PU. The exterior coating is styrene-acrylic dispersion with additional modifiers and quartz fillers as well as rebared cement fiber glass.

We care about the environment! Our Products are free from harmful substances for people and environment.

We have a **unique technology** and materials which allow us easily reconstruct a given architectural detail.

Our products are not only **aesthetic and elegant**, but also, are a bridge between past decoration traditions and technological novelties in building.

CAUTION! The colour of the products presented in this catalogue is only an exemplary colour.

EN

Technologie & Materialien

Unsere Produkte werden ausschließlich aus hochwertigen zertifizierten Rohstoffen hergestellt. Die Produkt Kerne werden aus expandierten Polystyrol-Schaumstoffen (EPS) oder Polyurethan-PU hergestellt. Die äußere Beschichtung ist Styrol-Acryldispersion mit zusätzlichen Modifizierern – Quarzfüllstoffen sowie Zementfibergläsern hergestellt.

Wir kümmern uns um die Umwelt! Unsere Produkte sind frei von Schadstoffen für Menschen und die Umwelt.

Wir haben eine **einzigartige Technologie** und Materialien, die es uns erlauben, ein gegebenes architektonisches Detail leicht zu rekonstruieren.

Unsere Produkte sind nicht nur **ästhetisch und elegant**, sondern auch, sind eine Brücke zwischen Vergangenen Dekoration Traditionen und technologischen Neuheiten in der Bauindustrie.

ACHTUNG! Die Farbe der dargestellten Produkte in diesem Katalog ist nur eine beispielhafte Farbe.

Wysoka elastyczność
oraz wytrzymałość

Rdzeń produktu wykonany z wysokiej jakości
polistyrenu ekspandowanego EPS200

Dwa typy powłok styrenowo-akrylowych:

- gładka, o ostrych i wyrazistych krawędziach
- gruboziarnista, imitująca naturalny piaskowiec

Nowość na Polskim rynku! Ciepłe parapety

New on the European Market! Warm Sills \ Neu auf dem europäischen Markt! Warme Fensterbänke

- rdzeń z utwardzonego styropianu zapewnia wy-
trzymałość oraz izolację na najwyższym poziomie
- masa dyspersyjna wzmocniona mikrowłóknami
oraz siatką zbrojeniową
- nadaje się do malowania
- 7 wariantów wykończenia

Zamówienia indywidualne

Doświadczenie, wykwalifikowana załoga oraz najnowocześniejszy park maszynowy umożliwia nam realizację każdego zlecenia:

- skanowanie i rzeźby 3D (w dowolnym rozmiarze)
- płaskorzeźby
- formy tracone
- scenografie filmowe i teatralne
- panele dekoracyjne
- elementy reklamowe
- detale architektoniczne

EN

Special orders

Experience, qualified crew, and a new machine park which enables us the completion of every order:

- 3D Sculptures (in any size)
- Reliefs
- Molds
- Movie and Theatre Scenography
- Decorative Panels
- AD Elements
- Architectural Details

Individuelle Bestellungen

Erfahrenes und qualifiziertes Team und ein moderner Maschinenpark ermöglicht uns die Herstellung von jeder Bestellung:

- 3D Skulpturen (in beliebigen Maßen)
- Flachreliefe
- Formen
- Szenografie und Bühnenbild
- Dekorative Paneele
- Werbe-Elemente
- Architektonische Elemente

Skanowanie obiektów 3D

Dzięki zaawansowanej technologii, doświadczeniu, wysokich kwalifikacjach zawodowych jesteśmy w stanie sprostać nawet najtrudniejszym wymaganiom naszych Klientów.

Za pomocą profesjonalnego skanera możemy zwymiarować elementy wykonane z materiałów niemożliwych do mierzenia konwencjonalnymi metodami w różnych wielkościach, strukturach i kształtach.

Skanujemy obiekty pod własne potrzeby dekoratorskie, jak i świadczymy usługi skanowania 3D, dzięki którym szybko i precyzyjnie odwzorujemy rzeczywisty model obiektu.

Tworzymy kompleksowe modele 3D rzeźb, posągów, figur i innych elementów przestrzennych, które następnie odtwarzamy frezując je w materiałach piankowych, głównie EPS i XPS oraz w drewnie lub płytach MDF.

Scanning 3D objects

Thanks to advanced technology, experience and high professional qualifications, we are able to meet even the most difficult requirements of our clients.

With the help of a professional scanner, we can dimension elements made of materials impossible to measure by conventional methods, in various sizes, structures and shapes.

We scan objects for our own manufacturing needs, as well as provide 3D scanning services, thanks to which we can quickly and accurately reproduce the real object model.

We create comprehensive 3D models of sculptures, statues, figures and other spatial elements, which we then reproduce by milling them in foam materials, mainly EPS and XPS as well as in wood or MDF plates.

Scannen von 3D-Objekten

Dank fortschrittlicher Technologie, Erfahrung und hoher fachlicher Qualifikation sind wir in der Lage, auch die schwierigsten Anforderungen unserer Kunden zu erfüllen.

Mit Hilfe eines professionellen Scanners können wir Elemente aus Materialien, die mit herkömmlichen Methoden nicht messbar sind, in verschiedenen Größen, Strukturen und Formen dimensionieren.

Wir scannen Objekte für unsere eigenen Fertigungsanforderungen und bieten 3D-Scanservices an, mit denen wir das reale Objektmodell schnell und genau reproduzieren können.

Wir erstellen umfassende 3D-Modelle von Skulpturen, Statuen, Figuren und anderen räumlichen Elementen, die wir dann reproduzieren, indem wir sie in Schaummaterialien, hauptsächlich EPS und XPS, sowie in Holz- oder MDF-Platten fräsen.

Sztukateria WMB PREMIUM

STO Verolith to lekki, jednolity surowiec mineralny, wykonany w ponad 90% z perlitu, skały pochodzenia wulkanicznego. Przyjazny dla środowiska (ekologiczny). Jest to jedyna w swoim rodzaju kompozycja materiałowa składająca się z lekkiego wypełniacza i środków wiążących.

Sztukateria WMB PREMIUM produkowana z materiału STO Verolith charakteryzuje się odpornością na uderzenia, odpornością na działanie chemikaliów, bakterii, grzybów, porostów czy glonów.

Ta linia produktowa wyróżnia się całkowitą mrozoodpornością, posiadają również ekstremalnie niski współczynnik rozszerzalności termicznej, dzięki któremu unikamy ewentualnych rys i spękań na połączeniach gzymsów i listew.

Verolith jest nienasiąkliwy oraz niepalny. (klasyfikacja w zakresie reakcji na ogień zgodnie z normą PN-EN 13501-1: A2-s1, d0)

Docinka czy szlifowanie na budowie nie pogarsza jakości elementów, gdyż materiał jest bardzo jednorodny i wyjątkowo łatwy w obróbce oraz montażu. Powierzchnia sztukaterii jest gładka, a krawędzie detali są wyjątkowo ostre i wyraziste.

Sztukateria przypomina strukturą powierzchnię gładkiego betonu. Można zachować ten wygląd korzystając z transparentnej powłoki ochronnej lub malować na dowolne kolory farbami elewacyjnymi.

Stucco WMB PREMIUM

STO Verolith is a light, coherent mineral raw material, made in over 90% of perlite, volcanic rocks. Environmentally friendly (ecological). It is a unique material composition consisting of a light filler and binding elements.

Stucco WMB PREMIUM produced from STO Verolith material is characterized by impact resistance, resistance to chemicals, bacteria, fungi or algae.

This product line is distinguished by total frost resistance it has also an extremely low coefficient of thermal expansion, thanks to which we avoid possible scratches and cracks on the joints of cornices and profiles.

Verolith is water-resistant and non-flammable. (classification in terms of reaction to fire in accordance with PN-EN 13501-1: A2-s1, d0)

Cutting or sanding at the construction site does not affect the quality of the elements, because the material is very homogeneous and extremely easy to process and assemble. The stucco surface is smooth and the edges of the details are extremely sharp and expressive.

The stucco structure resembles a smooth concrete surface. You can preserve this look using a transparent protective coating or paint in any colors with facade paints.

Stuck WMB PREMIUM

STO Verolith ist ein leichter, mineralischer Rohstoff, der zu über 90% aus Perlit und Vulkangestein hergestellt wird. Umweltfreundlich (ökologisch). Es ist eine einzigartige Materialzusammensetzung, die aus einem leichten Füllstoff und Bindemitteln besteht.

Stuck WMB PREMIUM aus STO Verolith Material zeichnet sich durch Schlagfestigkeit, Beständigkeit gegen Chemikalien, Bakterien, Pilze oder Algen aus.

Diese Produktlinie zeichnet sich durch totale Frostbeständigkeit aus, sie haben auch einen extrem niedrigen Wärmeausdehnungskoeffizienten, wodurch mögliche Kratzer und Risse an den Fugen von Gesimsen und Profile vermieden werden.

Verolith ist wasserbeständig und nicht brennbar. (Einstufung hinsichtlich des Brandverhaltens nach Brandklassifizierung A2-s1, d0 nach EN 13501-1)

Das Schneiden oder Schleifen auf der Baustelle beeinträchtigt die Qualität der Elemente nicht, da das Material sehr homogen und äußerst einfach zu verarbeiten und zu montieren ist.

Die Stuckoberfläche ist glatt und die Kanten der Details sind extrem scharf und ausdrucksstark. Die Stuckstruktur ähnelt einer glatten Betonoberfläche. Sie können diesen Look mit einer transparenten Schutzbeschichtung oder Farbe in beliebigen Farben mit Fassadenfarben erhalten.

Ciepłe parapety

Warm Window Sills /
Warme Fensterbänke

Ciepłe parapety

Ciepłe parapety WMB są szczególnie polecane w nowoczesnym, energooszczędnym i pasywnym budownictwie. Termoparapety umożliwiają znaczne poprawienie bilansu energetycznego budynku, są idealnym rozwiązaniem przy dociepleniu przestrzeni przyokiennej.

Co wyróżnia nasze parapety?

- Możliwość zamówienia spersonalizowanego rozmiaru i kształtu idealne do stosowania w nowym budownictwie, jak i przy renowacjach starych elewacji
- Wysoka wytrzymałość na uszkodzenia mechaniczne
- Możliwość nałożenia ich na stare parapety bez konieczności demontażu poprzednich parapetów
- Doskonale izolują – parapety WMB eliminują mostki termiczne oraz efekt tzw. zimnego parapetu
- Łatwa docinka i montaż – niska waga ok. 2-3 kg/mb
- Fabryczne 5% nachylenie ułatwiające odprowadzenie wody

Warm window sills

Warm WMB window sills allow to significantly improve the energy balance of the building, they are ideal for insulation of window space. Especially recommended in modern energy-saving passive house construction.

What sets our window sills apart?

- Possibility to order a personalized size and shape

- Perfect for use in new buildings as well as renovating old facade
- High resistance to mechanical damage
- It is possible to put them on old window sills without having to dismantle the previous window sills
- Perfect insulation – WMB window sills eliminate thermal bridges and the so-called cold windowsill
- Easy cutting and assembly – low weight approx. 2-3 kg/m
- Factory 5% slope for easy drainage

DE

Warme Fensterbänke

Warme WMB-Fensterbänke verbessern die Energiebilanz des Gebäudes erheblich und eignen sich ideal zur Isolierung von Fensterflächen. Besonders empfehlenswert im modernen energiesparenden Passivbau.

Was zeichnet unsere Fensterbänke aus?

- Möglichkeit, eine personalisierte Größe und Form zu bestellen
- Perfekt für den Einsatz in Neubauten sowie für die Renovierung alter Fassaden
- Alle Fensterbänke sind sehr widerstandsfähig gegen mechanische Beschädigungen
- Es ist möglich, sie auf alte Fensterbänke zu legen, ohne die vorherigen Fensterbänke demontieren zu müssen
- Perfekt dämmung – WMB Fensterbänke beseitigen Wärmebrücken und die sogenannten kalte Fensterbank
- Einfaches Schneiden und Zusammenbauen – Geringes Gewicht ca. 2-3 kg/m
- Fabrikneigung von 5% für eine einfache Entwässerung

Dekory mogą być stosowane we wnętrzach, jak i na elewacji.

EN

Decors may be applied in interiors as well as on the facade.

DE

Dekore können appliziert sein als Innens-
tuck wie auch als Element auf der Fassade.

Łuki

Arches / Bogen

Jesteśmy w stanie wykonać praktycznie każdy element łukowy, według dowolnego przekroju listew i gzymsów.

Szczegółowe informacje dotyczące w jaki sposób wykonać prawidłowy pomiar łuków, znajdą Państwo na naszej stronie internetowej.

EN

We are able to manufacture virtually every arch element according to a given facade profile or cornice cross-section.

Particular informations concerning how to make a proper arch measurement are to be found on our website.

DE

Wir sind im Stande praktisch jedes Bogenelement Element zu herstellen nach beliebiger Leiste oder Gesims Querschnitt.

Ausführliche Informationen wie sollte man Bogen messen werden Sie auf unserer Webpage finden.

Kleje, farby, akcesoria

Idealne rezultaty wymagają profesjonalnych narzędzi. Z szerokiej gamy produktów budowlanych wybraliśmy dla Ciebie narzędzia stworzone dla zawodowców. Wysoka jakość materiałów wykończeniowych ułatwi Ci szybki i wydajny montaż. Jakość użytych komponentów gwarantuje długotrwały, piękny efekt.

Do montażu sztukaterii elewacyjnej będziesz potrzebował:

- Kleje poliuretanowe **Sto Turbofix** lub **Ceresit CT84** zapewniają trwałe mocowanie sztukaterii elewacyjnej
- Klej **StoColl Fix**, dzięki bardzo dobrej przyczepności początkowej oraz wysokiej sile klejenia ułatwi montaż parapetów i cięższych elementów
- Uszczelniacz **StoSeal F 505** zabezpieczy szczeliny dylatacyjne i połączenia sztukaterii z elewacją przed infiltracją wody
- **Masa Naprawcza WMB** gwarantuje pewne i estetyczne połączenia powłoki sztukaterii elewacyjnej
- **StoColor Dryonic®** zapewnia najwyższy stopień bieli i długoletni efekt. Farba dostępna jest również w szerokiej palecie kolorów

Do montażu sztukaterii wewnętrznej zalecamy:

- **Klej Mardom Decor Pro** można szlifować i malować, co pozwala na użycie go do spoinowania sztukaterii i połączeń ściana – listwa
- **Klej Pattex ONE FOR ALL**, dzięki bardzo wysokiej przyczepności początkowej, doskonale sprawdzi się do montażu profili na suficie (np. listew karniszowych lub ściennych)
- **Creativa C200** lub **Śnieżka ACRYL-PUTZ® LT 22** ułatwią wykończenie połączeń między listwami
- Farba **Tikkurila Optiva 5** zagwarantuje trwały kolor i wysoką odporność na zmywanie i szorowanie. Dostępna jest w szerokiej gamie

Adhesive, Paints, Accessories

Perfect results require professional tools. From wide construction product range we have selected the tools for professionals. High finishing quality materials will facilitate quick and efficient assembly. The components guarantee a long-lasting effect.

For the installation of facade stucco you will need:

- **Sto Turbofix** or **Ceresit CT84** polyurethane adhesives that provides durable fixing for facade stucco
- **StoColl Fix** adhesive, thanks to very good initial adhesion and high adhesive strength it will facilitate the installation of window sills and heavier elements
- **StoSeal F 505** sealant that will protect joints and stucco connections with the facade before water infiltration
- **WMB Repair Mass** guarantees reliable and aesthetic joints of facade stucco
- **StoColor Dryonic®** ensures the highest degree of whiteness and a long-lasting effect. The paint is also available in a wide range of colours

For the installation of interior stucco we recommend:

- **Mardom Decor Pro** can be sanded and painted, used for joints between stucco with and the wall.
- **Pattex ONE FOR ALL** adhesive, thanks to its very high initial adhesion ideally suited to mounting profiles on the ceiling (e.g. cornice or wall mouldings)
- **Creativa C200** or **Śnieżka ACRYL-PUTZ® LT 22** will facilitate finishing connections between the profiles
- **Tikkurila Optiva 5** will guarantee long-lasting colour durability to washing and scrubbing. It is available in a wide range of colours

Klebstoffe, Farben, Zubehör

Perfekte Ergebnisse erfordern professionelles Werkzeug. Um die Montage zu erleichtern haben wir eine Reihe von Bauprodukten für Sie ausgewählt. Hochwertige Materialien werden für eine schnelle und effiziente Montage sorgen. Qualitative Komponente garantieren eine Langlebigkeit des Produktes.

Für die Installation von Fassadenstuck benötigen Sie:

- Polyurethan-Klebstoffe von **Sto Turbofix** oder **Ceresit CT84** sind langlebig und dienen für Befestigung von Fassadenstuck
- **StoColl Fix** Kleber, dank sehr guter Anfangshaftung und eine hohe Klebekraft erleichtert den Einbau von Fensterbänken und schwereren Elementen
- Die Dichtungsmasse **StoSeal F 505** schützt Dehnungsfugen und Stuckverbindungen mit der Fassade vor dem Eindringen von Wasser
- **WMB Reparatur Masse** garantiert zuverlässige und ästhetische Verbindungen von Fassadenprofilen
- **StoColor Dryonic®** sorgt für höchsten Weiß Farbton und langlebige Wirkung. Diese ist auch in einer Vielzahl von Farben erhältlich.

Für den Einbau von Innenstuck empfehlen wir:

- **Mardom Decor Pro** kann bei Bedarf geschliffen und bemalt werden. Verwenden Sie auf Wand – Leiste Verbindung.
- **Pattex ONE FOR ALL** Kleber, dank seiner sehr hohen anfänglich Haftung, ideal zur Montage von Profilen an der Decke geeignet (z. B. Gesims oder Wandleisten)
- **Creativa C200** oder **Śnieżka ACRYL-PUTZ® LT 22** erleichtern die Endbearbeitung Verbindungen zwischen den Leisten
- **Tikkurila Optiva 5** garantiert eine lang anhaltende Farbe Beständigkeit gegen Waschen und Schrubben. Es ist in einer breiten Palette erhältlich.
